SKILLS —

- *Languages*
 - C | C++
 - C#
 - Java
 - Python
 - PHP | JavaScript
 - SQL
 - HTML5 | CSS
- *Tools*
 - UE5 (Blueprints, C++)
 - Unity 5/6
 - Perforce | P4 Code Review
 - Frostbite
 - Jira
 - Visual Studio 2022
 - GitHub
 - Azure
- *Proficiencies*
 - Physics & 3D math
 - Linear algebra
 - Team management
 - Agile development
 - Pixel art

EDUCATION —

University of Central Florida 2026

MS, Interactive Entertainment

- GPA: 4.0
- *Honors and Awards:*
 - 1st Place, FIEA Game Jam
 - Most Complete Experience, 68K Game Awards
 - Player's Choice, Rapid Prototype Awards
- Florida Interactive Entertainment Academy (**FIEA**) programming track

University of Florida May 2025

BS, Digital Arts and Sciences

- GPA: 3.90
- *Honors and Awards:*
 - Summa Cum Laude
 - Dean's List
 - Quest Scholar
 - Florida Academic Scholar
 - Gator-Aid Customer Service Award

WORK EXPERIENCE —

Lead Programmer, Studio Kismet

UE5, C++, Blueprints, P4V, Jira Oct 2025 - present

- Programmed core physics-based rotation and traversal mechanics on a movement-focused speed platformer
- Created a pipeline for generating performance reports using Unreal Insights and Powershell scripting
- Organizing, bug fixing, and providing code reviews for a team of 6 on an overall team of 18

Peer Mentor, UF CISE Dept.

Blender, Canvas

Aug 2024 - May 2025

- Held weekly office hours and assisted with 20+ labs, providing technical assistance and education on Blender and its tools
- Reviewed and graded 3D modeling and animation work in Blender for 30 students per semester

Research Assistant, INDIE Lab

Unity 5, Meta SDK

May 2024 - Aug 2024

- Built on a large existing codebase to write a configurable VR hand jitter system
- Collaborated on work with researcher stakeholders to create an application ready for human testing

PROJECT EXPERIENCE —

Massive Multiplayer Mobile Aquarium

Full-Stack Unity Mobile Sim

Aug 2026 - present

- Connected Azure SQL Database to Unity to allow for online storage of user and fish information
- Architected server-authoritative connectivity using the FishNet framework
- Maintaining updated documentation via my website

FIEA Game Engine

Real-Time C++ Content System

Jan 2026 - Apr 2026

- Built a data-driven game engine that uses formatted JSON as a scripting language
- Utilized chain of responsibility, builder, and singleton design patterns to enable parsing of data types from JSON into custom storage objects
- Wrote extensive unit testing under a test-driven development style to validate systems

Final Fantasy I Recreation

C / OpenGL JRPG

Nov 2025 - Dec 2025

- Developed tooling script to convert sprite images into formatted game data representing map collision, tile type, and NPC spawns/placement
- Re-constructed FF1's battle, menu, and movement systems from scratch, including statistics, animations, sequencing, and original glitches

INTERESTS —

- Outdoorsmanship | Gaming history | Writing
- *Favorite game:* Final Fantasy VI
